ABOUT US

Welcome To Our Company

At Multitech, we are dedicated to providing innovative and reliable solutions for protecting metal surfaces against corrosion and degradation. With a commitment to quality, performance, and customer satisfaction, we have established ourselves as a trusted partner for businesses across industries.

Since our inception, we have been driven by a relentless pursuit of excellence, pushing the boundaries of technology and engineering to deliver best-in-class metal protection solutions.

MULTITECH MARKETING

We Provide The Best Solution

Metal Working Fluids

Our metalworking fluids are formulated to provide exceptional lubrication, resulting in smoother cutting action and reduced tool wear.

Rust Preventive Oils

Our rust prevention oil creates a protective barrier that effectively shields metal surfaces from moisture, humidity, salt spray, and other corrosive agents, preventing the formation of rust and corrosion.

RUST PREVENTION OILS

NOX-RUST® rust preventive oils are based on the CCI (Contact Corrosion Inhibition) Technology, which provides excellent corrosion protection to part in areas of high humidity and temperature. These products have approvals of leading global OEMs & the US Military. The Daubert 360 service supports PPAP (trials, approvals) & troubleshooting at end-customer locations globally.

APPLICATIONS

- Semi Finished Parts - Pressed Parts / CKD Parts In Transit, Unpainted Auto And Truck Body Sections During Shipments, Stampings, Sheet Metal Components, Phosphate And Black Dyed Products, Parts For Cutting And Polishing, Forgings, Castings, Tubes, Fasteners
- Finished Parts – Springs, Machine & Hand Tools, Aviation Parts, Gear Shafts, Bearings, Blades, Gear Parts, Wire And High Precision Parts (Both Ferrous & Non-Ferrous) For Domestic & Export Shipments
- Coils/Sheet - Cold Rolled Steel Sheets & Other Steel Mills Applications
- Enclosed Area/Parts - Fuel Tanks, Storage Tanks, Cylinders, Transmissions, Gear Housings, Clutch Compartments, Crankcases, Hydraulic And Cooling Circulating Systems

VCI PAPER & POLY

Daubert VCI® papers are packaging papers that provide corrosion protection (up to 5 years) based on Daubert VCI® Technology. These products have approvals from leading global OEMs. Daubert VCI® Papers are on the US Department of Defence Qualified Products List (QPL) for MIL-PRF-3420.

APPLICATIONS

- Automotive - Engine Storage And Transport, SKD/CKD Units In Racks Or Boxes, Stacked Metals With VCI Interleaving Or VCI Shrouds, Discs In Bulk Packaging, Individually VCI Wrapped Small Parts
- Heavy Equipment - Large Engine Export, Mining Equipment Shafts, Printer Rolls Storage, Machinery Export, Military Exports, Off Highway Vehicle Exports
- Preservation – Lay Up Of Pressure Vessels, Field Generators, Drilling Equipment And Other O&G Equipment
- Defence – Storage Of Artillery, Small Arms, Handguns, Rifles, Mortar & Ammunition. Complete Lay Up Of Armored, Utility, Recovery, Combat Vehicles; Tanks & Jet Fighters
- Iron & Steel - Steel Coils, Rolls, Bar Stock, Wires, Cables, Tubes, Pipes
- Precision Parts – Cast & Machined Parts In Individual Or Bulk VCI Packing, Stacked Parts On Pallets

VCI FILMS

Daubert VCI® films are packaging films like Premium Metal-Guard® & Ferro-Film® which provide corrosion protection (up to 2 years) based on Daubert VCI® & Multi Layer Technologies. These products have approvals from leading global OEMs & recommended for usage as Seaworthy Packaging.

APPLICATIONS

- Automotive - Engine Storage And Transport, SKD/CKD Units In Racks Or Boxes, Stacked Metals With VCI Interleaving Or VCI Shrouds, Discs In Bulk Packaging, Individually VCI Wrapped Small Parts
- Heavy Equipment - Large Engine Export, Mining Equipment Shafts, Printer Rolls Storage, Machinery Export, Military Exports, Off Highway Vehicle Exports
- Preservation – Lay Up Of Pressure Vessels, Field Generators, Drilling Equipment And Other O&G Equipment
- Defence – Storage Of Artillery, Small Arms, Handguns, Rifles, Mortar & Ammunition. Complete Lay Up Of Armored, Utility, Recovery, Combat Vehicles; Tanks & Jet Fighters
- Iron & Steel - Steel Coils, Rolls, Bar Stock, Wires, Cables, Tubes, Pipes
- Precision Parts – Cast & Machined Parts In Individual Or Bulk VCI Packing, Stacked Parts On Pallets

VCI EMITTERS

DAUBRITE® 5 VCI emitters are corrosion preventive devices designed to protect exposed metals inside packaging environments and enclosures. The corrosion inhibitors based on DAUBERT VCI® Technology emitting from each DAUBRITE® 5 volatile inside the space to form an invisible layer on the surface of the metal to protect against corrosion causing contaminants.

APPLICATIONS

Steel Enclosures ●

Toolboxes ●

Mechanical Controls ●

Electronic And Telecom Equipment ●

Utility Boxes ●

Gun Cabinets ●

Alarm Cabinets ●

Junction Boxes And Control Panels ●

NOX-RUST WAXES

NOX-RUST® rust preventive waxes are based on the CCI Technology, which provides long-term protection against corrosion, mud, snow & stone chipping to vehicle bodies in their usage life. These products have approvals from the leading global automotive, CV & Off highway OEMs for in-plant usage and aftermarket.

APPLICATIONS

- Cavity Areas (Doors & Other Hollow Interior Etc.) By Spray
- Frames & Chassis (Hot Melt Dip Coatings As An Alternative To E-Coat) By Dip
- Underbody (Final Assembly) By Spray
- Engine Room (Water Based Coating With Extreme Temperature Resistance) By Spray

SUMP CLEANERS

At Multitech, we offer a comprehensive range of sump cleaners tailored to the diverse needs of our clients in manufacturing, metalworking, and other industries. Our sump cleaners are built to withstand the rigors of industrial environments, featuring durable construction and reliable components that deliver exceptional performance and longevity.

Whether you need to clean small machine sumps or large industrial tanks, our sump cleaners are up to the task. They are equipped with advanced filtration systems that separate solids from liquids, allowing for efficient disposal or recycling of fluids while minimizing waste and environmental impact.

APPLICATIONS

- Sump Cleaners Are Used In Machine Shops And Manufacturing Facilities To Clean Coolant Sumps And Reservoirs Associated With Metalworking Machinery Such As Lathes, Milling Machines, And CNC Equipment.
- In Industries Where Metal Cutting And Machining Operations Are Prevalent, Such As Automotive, Aerospace, And Precision Engineering, Sump Cleaners Play A Crucial Role In Managing Metalworking Fluids.
- Sump Cleaners Are Also Used For Parts Cleaning And Maintenance Tasks In Various Industries, Including Automotive, Aerospace, And General Manufacturing.

DOSING PUMP

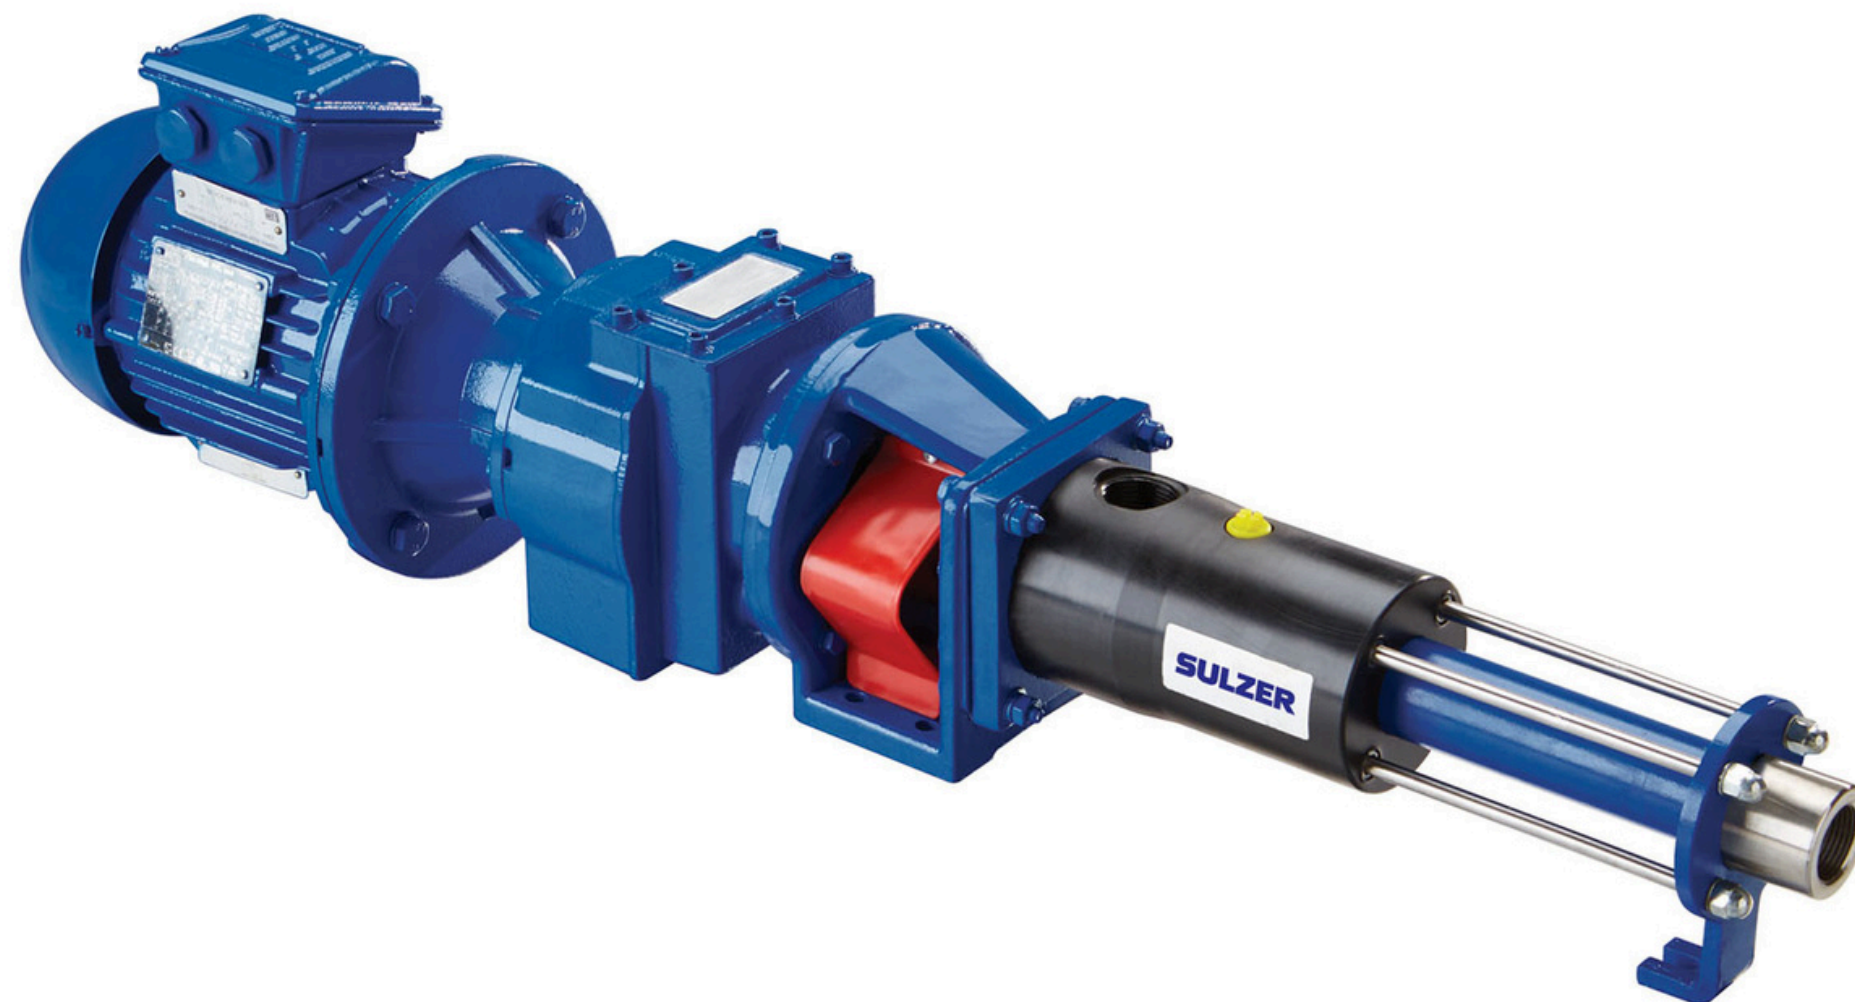

The distinguishing feature of our proportional volumetric dosing pumps is their ability to use the driving force of water to mix and produce a solution always proportional to the volume of water supplied. This means there's no need for electrical power, making the water dosing system not only eco-friendly but also incredibly practical and versatile.

Thanks to this advanced technology, Mixtron's proportional volumetric dosing pumps are capable of delivering precise and consistent dosing, regardless of flow or pressure variations. This makes them the ideal solution for a wide range of applications, including livestock and agriculture, always ensuring maximum effectiveness and reliability of the proportional dosers.

The absence of electrical components significantly reduces the risk of malfunction and cuts down maintenance costs, while the ease of use and quick installation will save you time and resources.

APPLICATIONS

- Dosing Pumps Are Widely Used In Water Treatment Facilities To Inject Precise Amounts Of Chemicals Such As Chlorine, Flocculants, And PH Adjusters.
- In Chemical Processing Plants, Dosing Pumps Accurately Dispense Raw Materials And Additives Into Reactors And Mixing Vessels.
- Dosing Pumps Are Used To Add Flavorings, Colorings, Preservatives, And Other Ingredients In Precise Quantities During The Manufacturing Process.

RUST REMOVER

RUST REVENGE® is a non-hazardous ready-to-use water-based rust remover based on chelating technology. It washes away surface rust from ferrous metals with a unique neutral pH-based solution without harsh chemicals. Immerse the rusted part into RUST REVENGE® and watch the rust disappear in 30 minutes to a few hours.

APPLICATIONS

- Small Parts – Dipping In Undiluted RUST REVENGE® Till The Time Rust Is Removed
- Large Parts – Dip Method Is Preferred. If Dipping Is Not Feasible, Soak A Fabric Generously In RUST REVENGE® And Place On The Rusted Surface. Seal It With A Plastic Film/Bag To Ensure Prolonged The Contact Time Of RUST REVENGE® Liquid With The Corroded Surface

METAL WORKING FLUID

The most important requirements to be met by metal cutting coolant fluid are reduction of tool wear, a high-quality surface finish, and economy of use. Hardcastle Petrofer's range of metal cutting processes, water-dilutable coolants, and neat cutting oils properties exceed these highly specialized expectations of the industry.

- Latest Coolant Technology
- High Performance Additives
- Extended Tool and Sump Life
- Excellent Corrosion Protection
- Eco-Friendly and Hygienically Harmless

Hardcastle Petrofer's is a leading manufacturer and supplier of cutting oils in India. Our product range of metal cutting fluids offers customers with a complete portfolio for the whole range of metal cutting processes.

ADVANCED AQUEOUS CLEANERS

X-CLEAN™ is a range of water-based cleaners based on Latest Surfactant Technology, which can deterge both ionic or non-ionic contaminations from parts or components. These acidic, neutral, or alkaline solutions can be used on various metals, plastics & other materials..

APPLICATIONS

- Spray Jet | Ultrasonic

CNC, VMC AND SPECIAL TOOLS

At Multitech, our dedication to comprehensive industrial solutions extends beyond just metalworking fluids. We pride ourselves on offering a diverse range of cutting-edge equipment and tools to elevate manufacturing processes to new heights of efficiency and precision. From CNC (Computer Numerical Control) machines to VMC (Vertical Machining Center) systems and specialized tools, we equip our clients with the tools they need to tackle even the most intricate machining tasks with confidence and ease.

Turning

The Multitech Turning line is a series that combines an ingenious grade and unique geometry to provide excellent machining performance. In addition, a series of general ISO turning inserts are available with chip breakers, holders and clamping systems.

Milling

The milling range is part of the standard milling line that has been developed to increase productivity and reduce cost while meeting the industries' diverse application demands.

Holemaking

Multitech, one of the leaders in holemaking products, has launched highly engineered drilling solutions. The remarkable performance behind the indexable TopDrill and head changeable DrillRush, enables customers to enhance their productivity as well as profitability

Solid End Mills

To effectively improve precision machining and product quality, Multitech has developed a series of solid carbide tools.

Parting & Grooving

The revolutionary Multitech clamp line is a multifunctional system that permits a host of operations such as parting, external turning and grooving, precision grooving and recessing, face grooving and face turning, undercutting and slitting.

Threading

Along with other market leading products, Multitech is also equipped with an ISO threading range and tailor made solutions for stationary applications and standard thread milling.

Tooling System

The tooling program developed by Multitech offers versatile chucking systems that are available to mount tooling on all types of machines. Systems currently available include BT MAS, ISO, NT, DIN 69871 and HSK.

GREASE AND SPECIALTY OIL

At Multitech, we understand that proper lubrication is the lifeblood of machinery, ensuring smooth operation, longevity, and efficiency. That's why we offer a comprehensive range of grease and specialty oil products meticulously formulated to meet the diverse needs of industrial applications.

APPLICATIONS

- Grease And Specialty Oils Are Used Extensively In Automotive Maintenance To Lubricate Various Components Such As Wheel Bearings, Chassis Joints, And Suspension Systems.
- In Industrial Settings, Grease And Specialty Oils Are Used To Lubricate A Wide Range Of Machinery And Equipment, Including Bearings, Gears, Chains, And Hydraulic Systems.
- Grease And Specialty Oils Play A Crucial Role In Aerospace And Aviation Applications, Where Performance, Reliability, And Safety Are Paramount.
- Power Plants Rely On Grease And Specialty Oils To Lubricate Turbines, Generators, Pumps, And Other Rotating Equipment.
- In The Mining And Construction Industries, Heavy-Duty Equipment Such As Excavators, Loaders, And Haul Trucks Require Robust Lubrication Solutions To Withstand Harsh Operating Environments And Heavy Loads.
- In Food And Beverage Processing Facilities, Lubricants Used In Machinery Must Meet Strict Regulations And Standards To Ensure Product Safety And Hygiene.

HYDRAULIC OIL AND ALL GENERAL LUBRICANTS

Today it is more important than ever to maintain the value of expensive assets. A modern plant requires the optimum in lubrication or power-transmitting media. The selection of the right viscosity and the correct level of additives are of utmost importance in preventing the damage and destruction of an expensive equipment.

- Good Corrosion Protection
- High Oxidation Stability
- Superior Anti-Wear Properties
- Excellent Anti-Foaming Characteristics

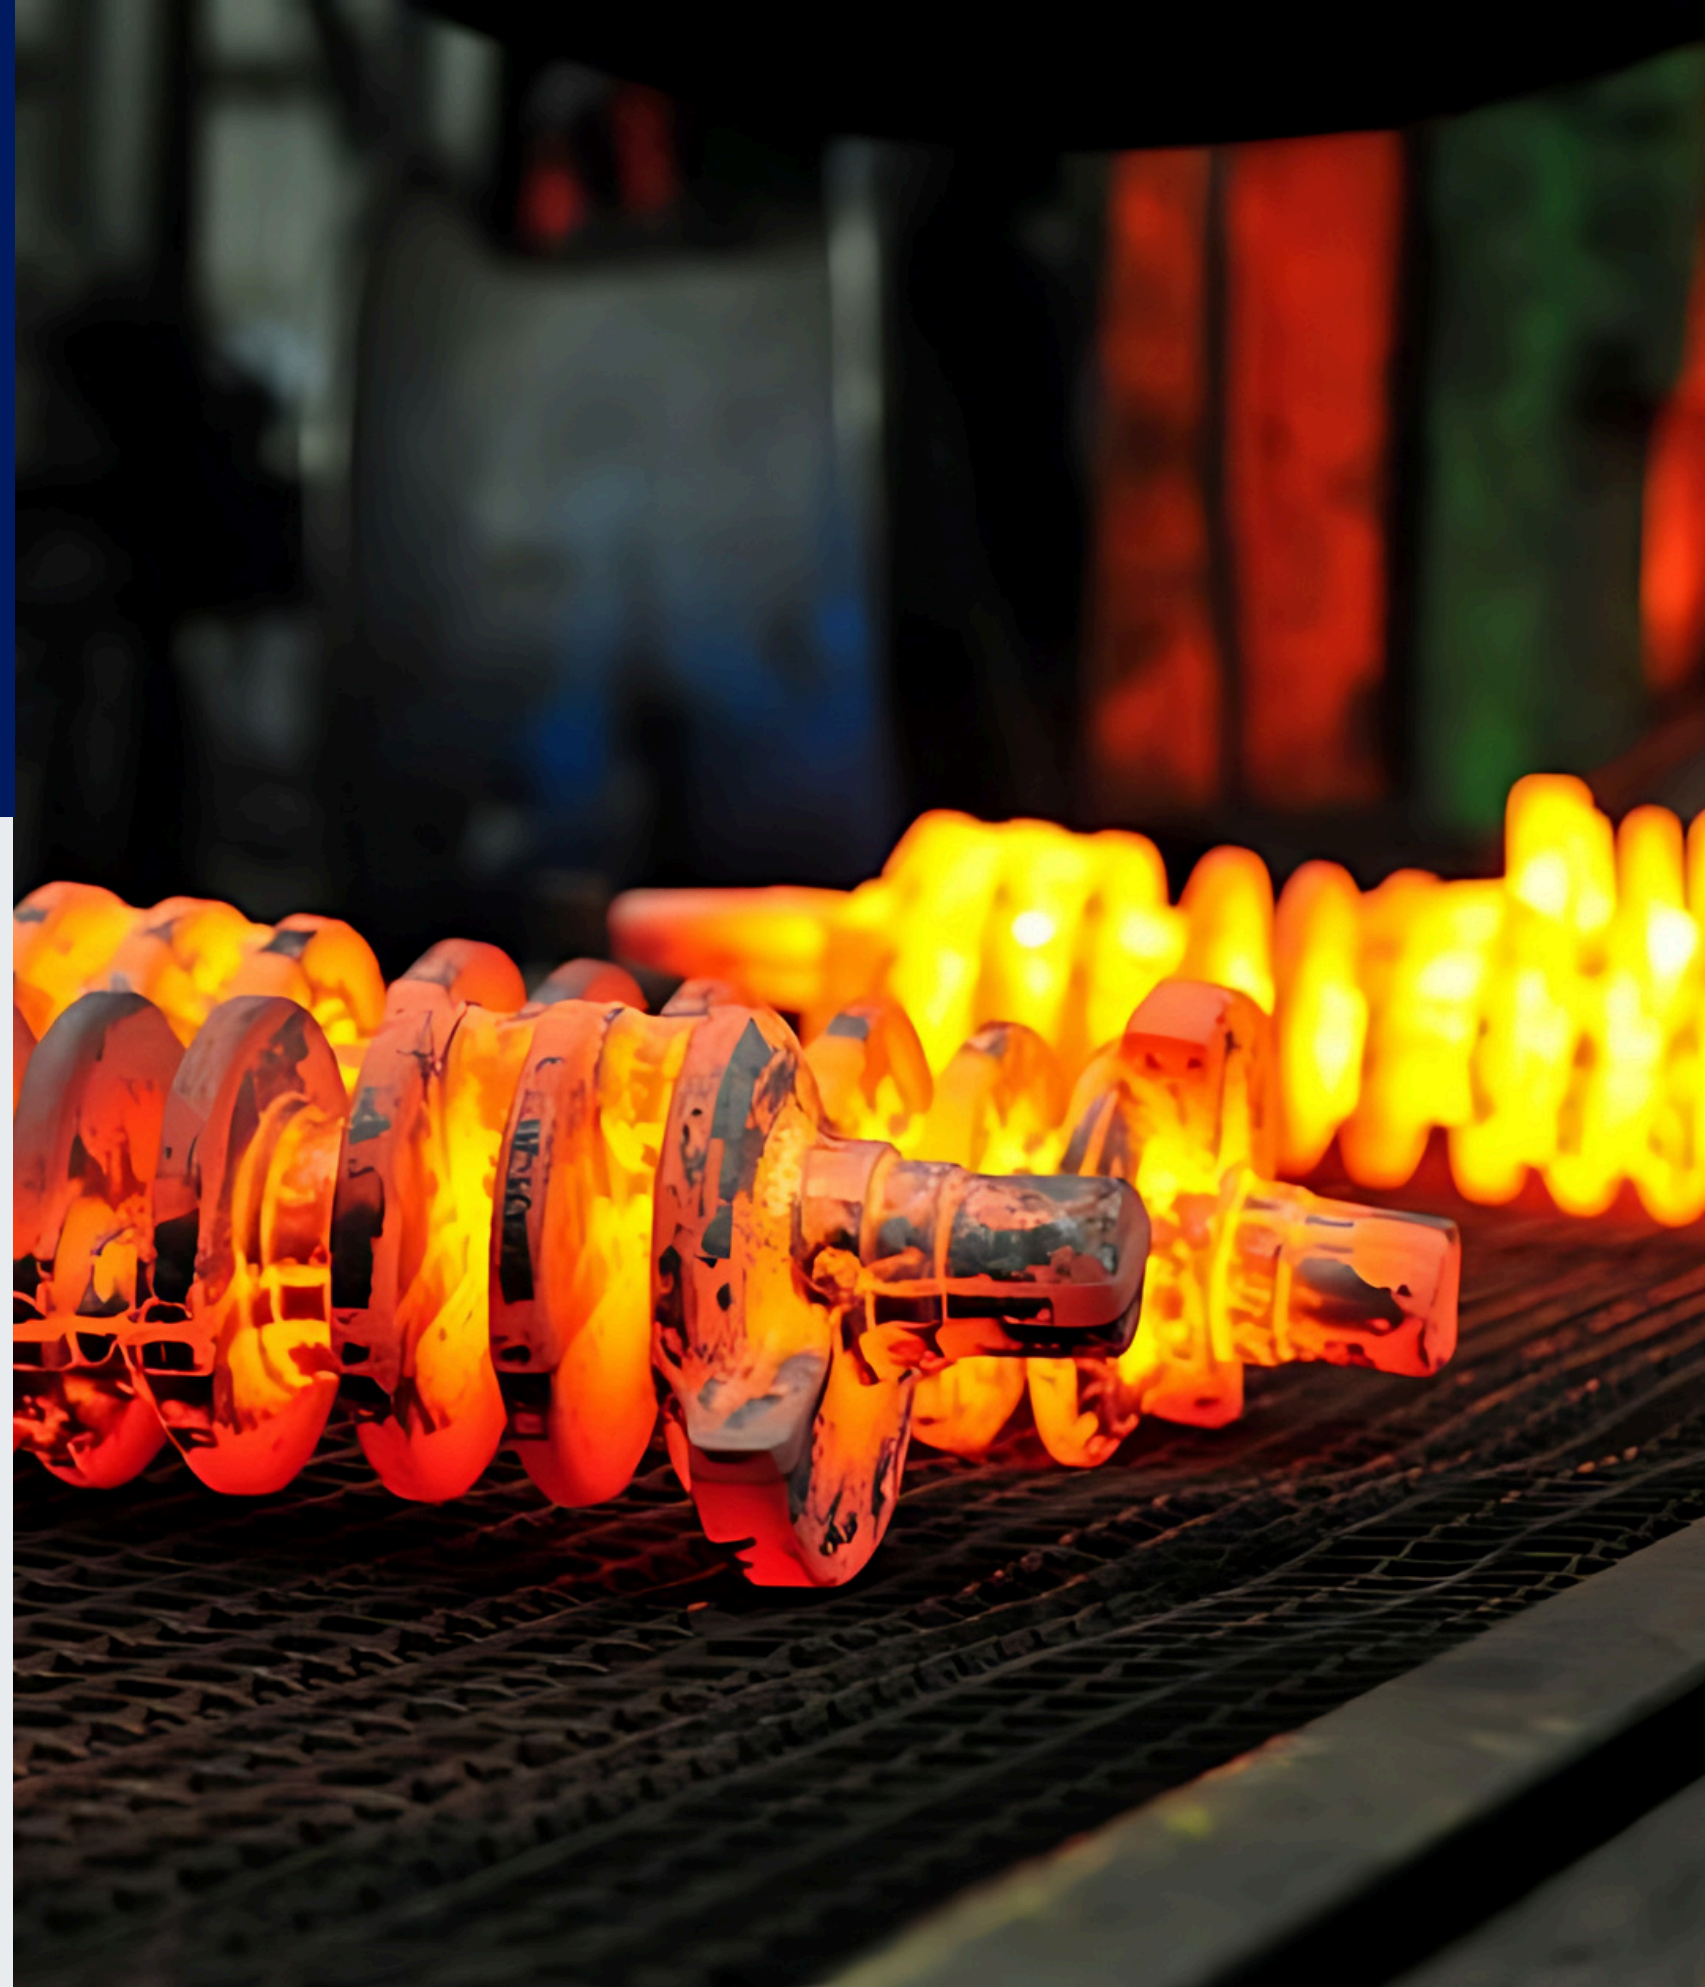

Hardcastle Petrofer is a leading manufacturer and supplier of Industrial lubricants in India. Our comprehensive range of Industrial Lubricants includes slideway lubricants, gear oils, spindle oils, mould oils, and more. Our comprehensive range of Industrial Lubricants provides our customers with the right-fit solutions for a variety of Industrial Lubrication processes.

FORGING LUBRICANT

All of our forging lubricants are designed to give maximum lubrication and release even in the most arduous forging processes. We can offer graphite-containing or graphite-free products, available in water dilutable or use as supplied formulations. We also have special products for circulating systems in automatic forging machines.

APPLICATIONS

- Spray Type Water Dilutable Graphite Based Forging Lubricants, For Simple And Critical Forging Applications For Increased Die Life.
- Oil And Graphite Based Forging Lubricants For Better Die Life And Precise Forgings With Reduced Smoke Generation.
- Oil And Graphite Free Synthetic Forging Lubricants For Relatively Simple Forgings And Warm Forging Applications.

To cater the ever-growing demand and stringent quality requirements of the Forging Industry, Hardcastle Petrofer offers an entire spectrum of hot forging lubricants. We are among the leading manufacturers and suppliers of forging lubricants in India.

● Automotive

● Defence

● Aerospace

● Aerospace

● Railways

DIE CASTING LUBRICANT

A complete service for your diecasting machine. Hardcastle Petrofer not only supplies a complete range of products but we also carry frequent inspection of fluids free of charge to ensure safety, uninterrupted production and long service life of components.

- Low Porosity
- Excellent Release
- Excellent Anti-Wear Properties
- High Lubricity
- Low Consumption

Hardcastle is a leading manufacturer and supplier of die-casting lubricants in India. Our comprehensive range of products offering solutions for specific application needs of the die-casting industry, ensuring high-quality output.

TRANSFORMER OIL

Transformer Oils are electrical insulating oils produced by distillation of virgin paraffinic and naphthenic crude oils followed by modern technologies involving high pressure hydrogenation and hydro-treatment. All the processes are monitored closely and appropriate Base Oil fractions are selected for further processing. Further processing involves removal of moisture and polar impurities to obtain good electrical properties. The technologies result in products with very low pour point, excellent oxidation stability, cooling characteristics and electrical properties. These properties make them suitable for the most demanding transformer applications.

APPLICATIONS

- Transformer Oil Acts As A Coolant, Dissipating The Heat Generated During The Operation Of Transformers. It Helps Maintain An Optimal Temperature, Preventing Overheating And Extending The Lifespan Of The Transformer.
- Transformer Oil Provides Electrical Insulation Between The Internal Components Of Transformers, Such As Coils And Windings, Preventing Short Circuits And Ensuring Safe And Reliable Operation.
- In Certain Types Of Transformers And Switchgear, Transformer Oil Is Used To Quench Electric Arcs That Occur During Switching Operations, Protecting The Equipment From Damage And Ensuring Operational Safety.
- Transformer Oil Enhances The Dielectric Strength Of Transformers, Enabling Them To Withstand High Voltages And Electrical Stresses Without Breaking Down. This Is Critical For Maintaining The Integrity And Performance Of Electrical Systems.

HEAT TREATMENT

Quenching Oils are heat treatment oils blended from solvent refined base oil with specially selected additives that facilitate fast quenching through proper and controlled cooling, and have outstanding chemical and oxidation stability. Quenching Oils also have excellent thermal properties, low volatility, high flash, and fire points.

- Quenching speed adapted to your heat treatment cycles
- Stability in service
- Reduction in consumption by drag out
- Resistance to oxidation and micro-organisms
- Ease to clean

OUR HEAT TREATMENT SOLUTIONS DELIVER -

- Increased Profitability
- Process Efficiency
- Energy Saving and Environmental Acceptance
- Operational Simplification

APPLICATIONS

Spray Jet | Ultrasonic

FIRE RESISTANT HYDRAULIC FLUIDS

Hydraulic equipment operating near heat sources such as molten metal open flame under extreme heat conditions are the most common potential sources of fire hazard. If there is any oil leakage, it can lead to a fire hazard. Fire resistant hydraulic fluids find their usage or function in such operating conditions as an alternative to combustible mineral based hydraulic oils for ensuring safe working conditions.

The unfortunate history of costly industrial fires caused by the accidental spraying of flammable petroleum hydraulic oil onto an ignition source is well documented.

To prevent this danger, fire-resistant hydraulic fluids were developed. There are many types of applications for fire-resistant hydraulic fluids in the steel making process. Starting with the ovens for making coke for the blast furnace through the final rolling and coiler operations, fire-resistant fluids have provided safer working conditions in the steel mill. Other properties include drying casting industries, forging and Extruding Presses, Fork Lift Trucks, Mining, Naval Missile Launch Equipment, OffShore Rigs, etc.

- Mining
- Die-Casting
- Aluminium Industry
- Offshore Applications
- Iron and Steel Industry
- Power Generation
- Glass Industry

METAL FORMING & WIRE DRAWING LUBRICANTS

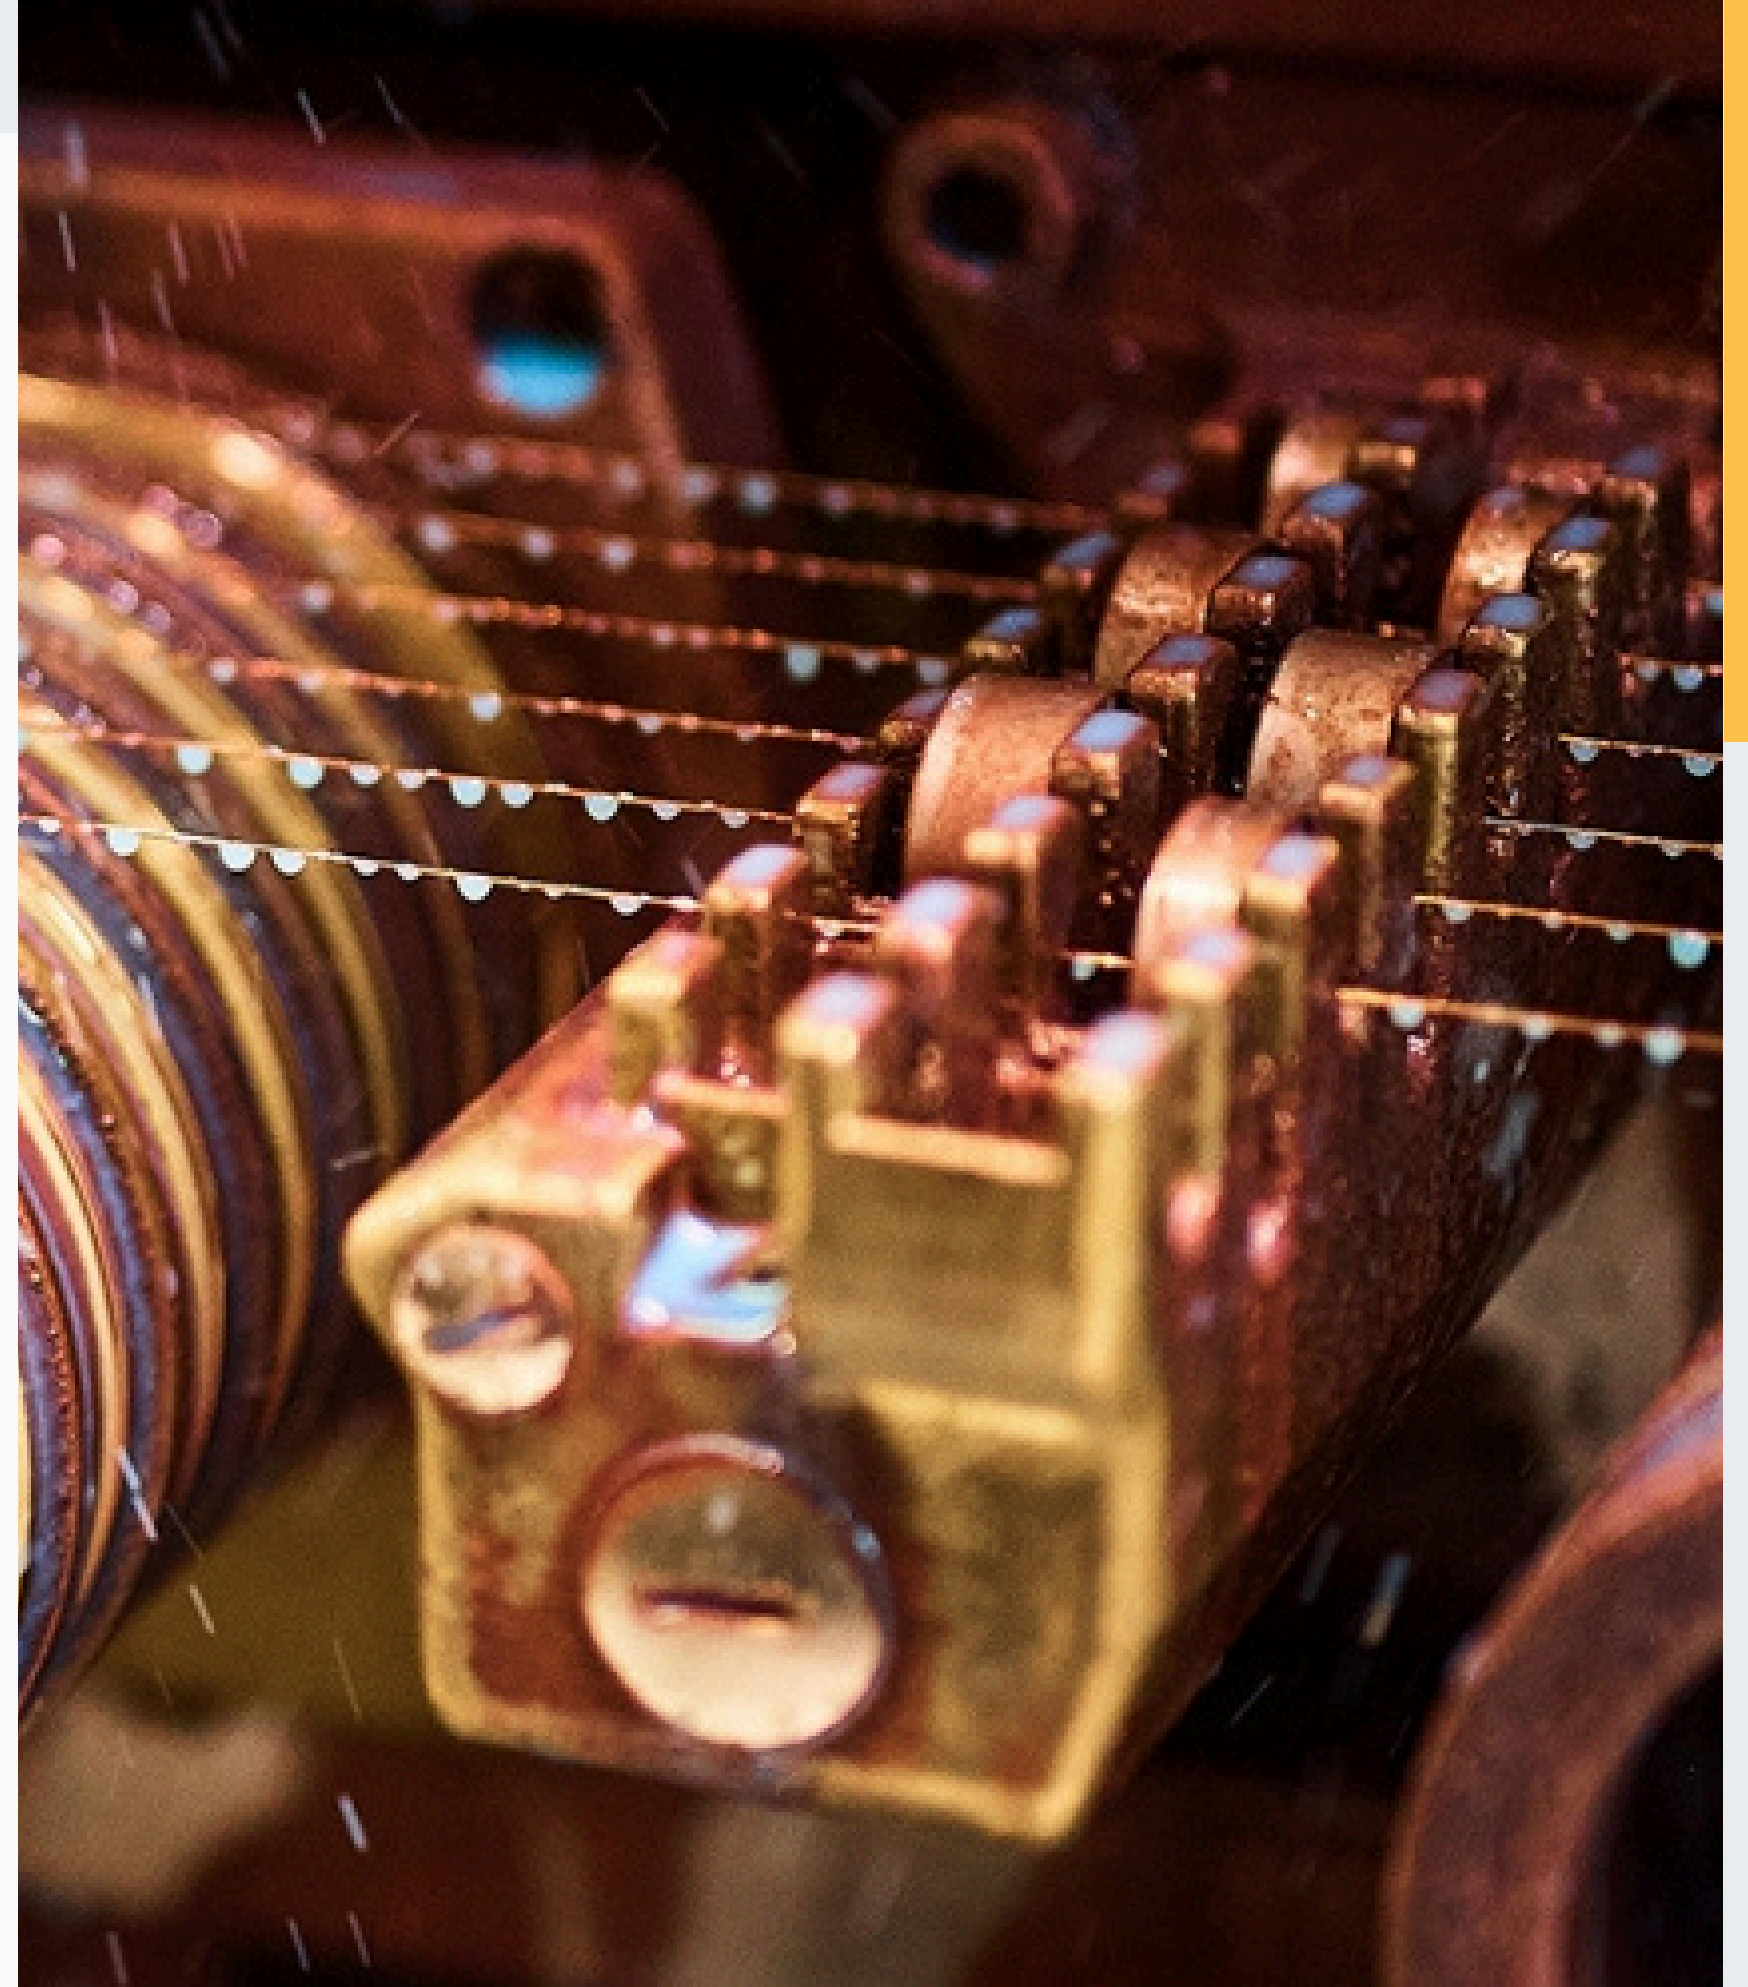

Hardcastle Petrofer's range of products for metal forming operations and wire drawing lubricants includes neat oils, emulsions, synthetic products & pastes. Our products are specially developed to meet the process requirements thereby ensuring highest productivity and quality for the user in these operations.

PROCESSES THAT ENGAGE OUR PRODUCT LINE

- Wire Drawing
- Cold Forming
- Fine Blanking
- Deep Drawing
- Sheet Metal Rolling

APPLICATIONS

Spray Jet | Ultrasonic

ROLLING AND COATING OIL

Hardcastle Petrofer offers a range of products for cold rolling of steel sheets of various thickness & width in reversing and tandem mills.

OUR HIROLL SERIES RANGE OF ROLLING OIL IS SUITABLE FOR -

- Mild Steel
- Mild Steel
- DD EDD Grades
- Silicon Steels
- Tin Plate Galvanizing Grades

APPLICATIONS

Spray Jet | Ultrasonic

MULTITECH MARKETING

WHY CHOOSE OUR PRODUCTS?

Our products

Our products undergo rigorous testing and quality control measures to ensure superior performance and reliability.

READ MORE

WHAT WE DO?

At Multitech, we specialize in the development, manufacturing, and distribution of a comprehensive range of metal protection solutions.

WHAT WE OFFER?

Our rust prevention oils and coatings offer unparalleled protection for metal surfaces, ensuring that your valuable assets remain pristine and corrosion-free.

VISION & MISSION

Our vision at Multitech is to be a global leader in metal protection solutions, recognized for our innovation, quality, and commitment to customer success.

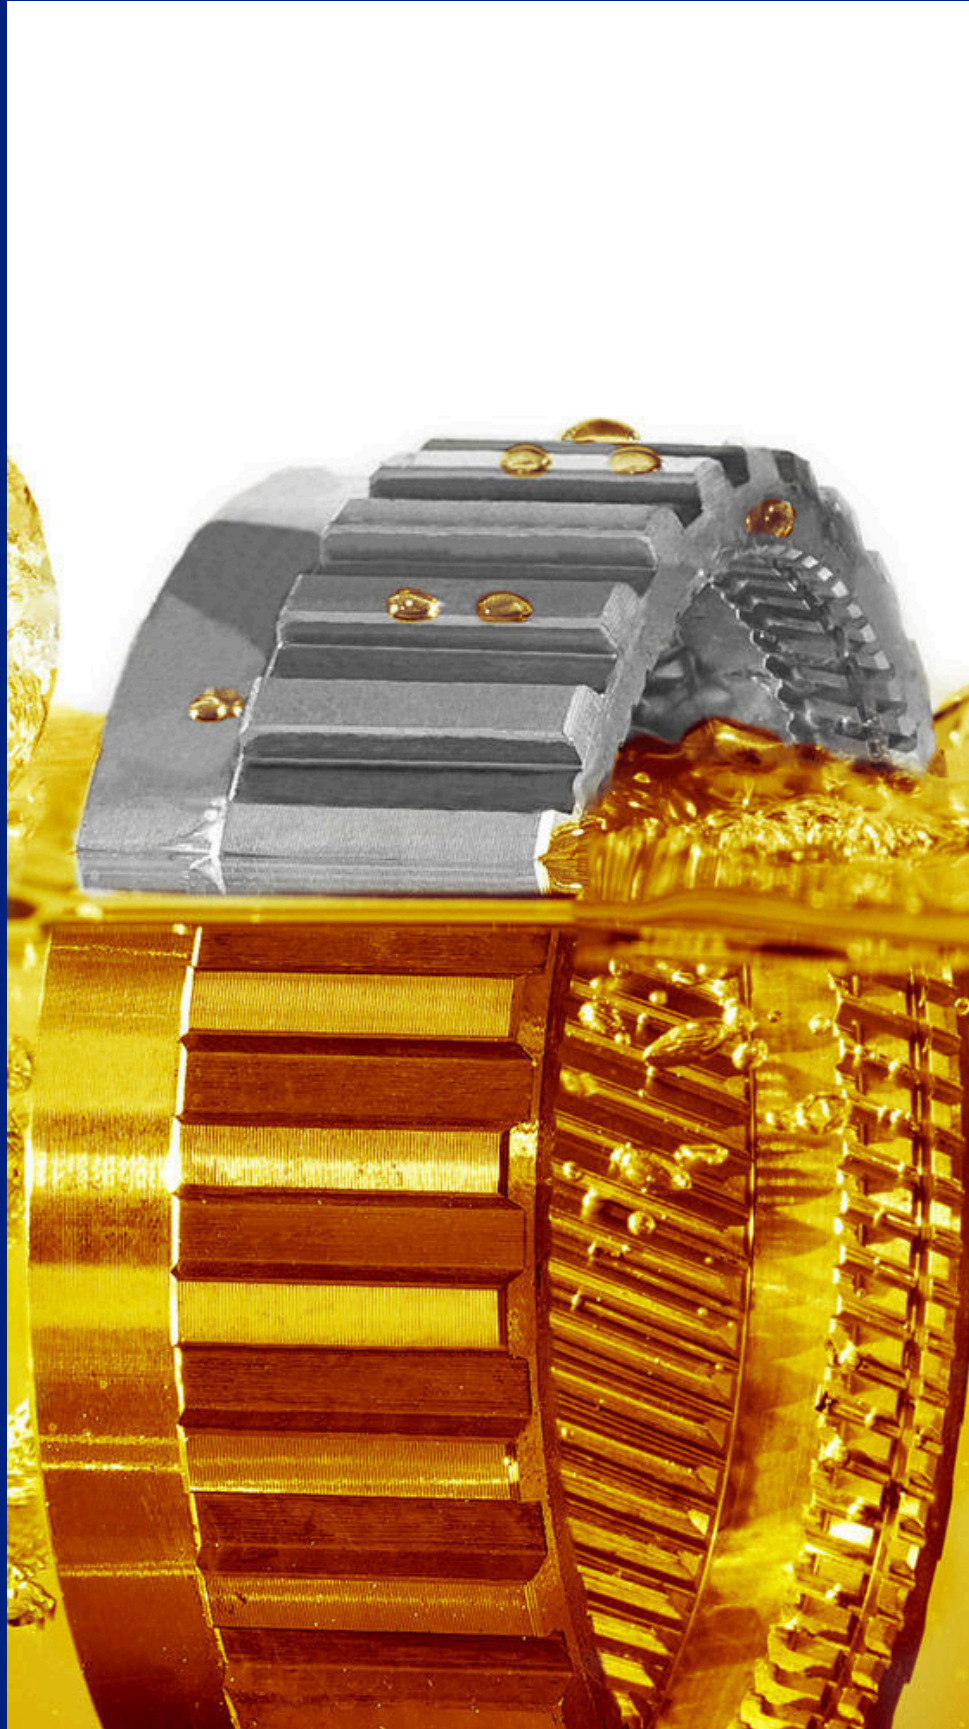

MULTITECH MARKETING

WHO WE ARE

METALWORKING FLUIDS ARE VITAL COMPONENTS IN INDUSTRIAL PROCESSES, ENABLING EFFICIENCY AND PRECISION IN THE SHAPING AND FINISHING OF METAL COMPONENTS.

At Multitech, our commitment lies in delivering top-tier metalworking fluid solutions tailored to the diverse needs of our clientele. With a deep understanding of the intricate demands of modern manufacturing, we meticulously formulate our fluids to offer optimal performance across a spectrum of applications. Whether it's machining, grinding, or cutting, our products stand as a testament to innovation and reliability, ensuring enhanced productivity and prolonged tool life. Backed by extensive research and development, our formulations prioritize not just performance, but also environmental sustainability and worker safety.

At Multitech, we don't just provide metalworking fluids; we deliver solutions that empower industries to thrive in an ever-evolving landscape.
